

PSM-Parts separate Mesh

PSM-Parts separate Mesh

Parts separate Mesh layer between components to minimize corrosion. The open mesh is breathable so air can flow freely to prevent rust and corrosion. The Parts separate Mesh are:

Breathable and stackable

Washable and reusable

Dirt, grease and water resistant

The plastic mesh will not absorb liquids such as cardboard dividers.

These multifunctional Parts separate Mesh are reusable. This all increases part quality at a lower cost. Parts separate Mesh are used in box liners, tote liners, basket dividers and tray liners to protect parts from chipping, scratching, corrosion and abrasion.

PSM-Parts separate Mesh (Bar Shelf Mesh Liner)

Parts separate Mesh is made of high-quality polyethylene, mesh structure, drainage, breathable, suitable for quick drying of cups, dishes, no more wiping with rags, reducing bacterial contamination. The life protection mesh pad has the function of buffering and protection to prevent the collision and damage of the utensils. Easy to cut to size, resistant to edible acids, grease and other harsh liquids or chemicals Ideal for kitchen, bar, refrigerator drain, breathable, clean, non-slip.

PSM-Parts separate Mesh Specifications

Code	Aperture	Thickness	Width	Color	Length
PSM-230100	0.3mm	1.0mm	100cm	Clear	50m
PSM-6060	0.6mm	2.2mm	60cm	Black	50m
