

Description

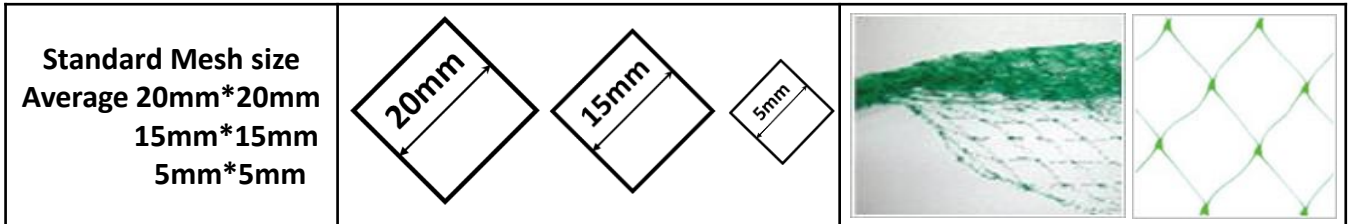

Anti-Bird Netting Diamond Mesh

Description

Extruded Anti-Bird Netting Diamond Mesh

Aperture Size

The diamond-shaped aperture size are measured while the diamond-shaped grid is stretched to the square diamond shape.

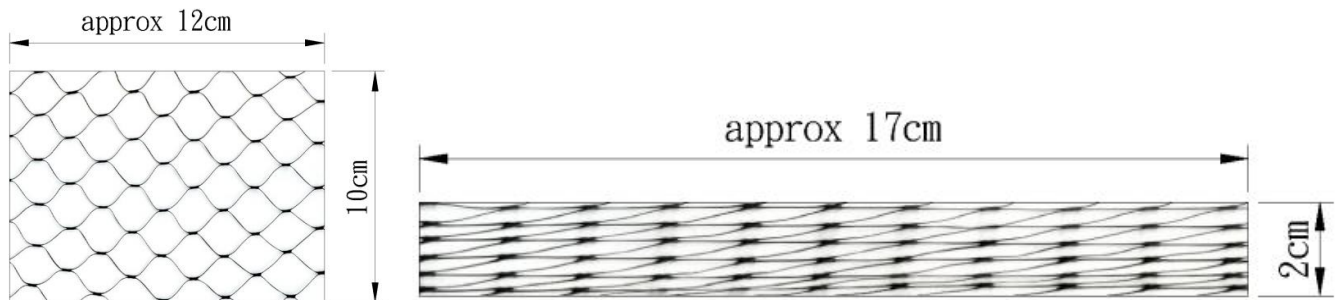

Weight & Expansion

The Extruded Anti-Bird Netting Diamond Mesh is heavier, stronger and more durable than the weaved bird block nettings in the market. The diamond-shaped mesh keep in the same shape when being stretched in different direction.

Expanded Configuration

The Prices and weights are for the expanded nettings that the diamond-shaped apertures are stretched as square ones (shown as below). The following example is 120sq cm (10cm wide X 12cm long).

Code Description

Code : ABM-0540B*10m
